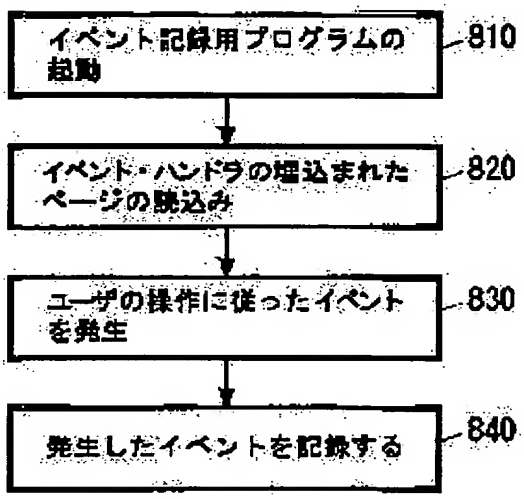
(54) SYSTEM/METHOD FOR AUTOMATICALLY EXECUTING BROWSER OPERATION

(57)Abstract:
PROBLEM TO BE SOLVED: To provide automatic execution system/method for recording/ reproducing an operation on a web browser.

SOLUTION: An event recording/reproduction program is read into a browser and the browser displaying contents is started. A page where an event handler collecting information required for event recording/reproduction is buried is read into the browser displaying the contents. An event is generated by following the event handler in accordance with the browser operation of a user in the browser displaying the contents (830). The event generated by the event recording/reproduction program is recorded and the recorded event is read by the event recording/reproduction program. The browser displaying the contents is operated in accordance with the event which is read.



LEGAL STATUS

[Date of request for examination]	22.07.1999
[Date of sending the examiner's decision of rejection]	
[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]	
[Date of final disposal for application]	
[Patent number]	3083805
[Date of registration]	30.06.2000
[Number of appeal against examiner's decision of rejection]	
[Date of requesting appeal against examiner's decision of rejection]	
[Date of extinction of right]
